Final Year Software Engineering Student at Bournemouth University | Former Associate Software Engineer at Vitality | Full-Stack Development (JavaScript, GraphQL, FastAPI, Python) | AWS Certified AI Practitioner

Professional Summary

Final-year Software Engineering student at Bournemouth University with 13 months of experience as an **Associate Software Engineer** at Vitality (UK), where I specialized in backend development using **GraphQL**, **NestJS**, and **TypeScript**, while also building internal testing tools with **React** and **JavaScript** to streamline development workflows.

I have a strong track record of delivering scalable full-stack applications with a particular focus on **React** and **FastAPI** across **Agile and SAFe environments**. Having recently gained the **AWS Certified AI Practitioner** certification, I am now dedicated to integrating AI capabilities into enterprise-grade software to solve real-world problems and deliver meaningful, innovative value to users.

Skills

Languages: Python, JavaScript, TypeScript, Java, Kotlin, SQL (PostgreSQL, SQLite)
Frameworks: React.js, FastAPI, Node.js, Nest.js, GraphQL, REST APIs
AI & Cloud: Large Language Models (LLMs), Prompt Engineering, AWS (Certified AI Practitioner)
Tools & Collaboration: Jira, Confluence, Git, Postman, GitHub, Android Studio
Methodologies: Agile, SAFe, Scrum

Professional Experience

Republic of Korea Army (Mandatory Service)
Tactical Systems & Communications Squad Leader | Sergeant

September 2024 - March 2026
South Korea

- **Led and supervised** a squad of 8+ personnel, coordinating technical operations to **maintain high system availability**.
- **Managed and optimized tactical network infrastructures**, proactively troubleshooting hardware and signal issues to ensure **24/7 connectivity**.
- Demonstrated strong **leadership and resilience** in a high-pressure, disciplined environment, consistently meeting rigorous operational standards.

Vitality
Associate Software Engineer

July 2023 - July 2024
Bournemouth, England, United Kingdom

- **Developed and maintained** production-ready backend services within a GraphQL engineering team using **GraphQL**, **NestJS**, **TypeScript**, and **Node.js**
- **Collaborated** effectively in a **Scaled Agile Framework (SAFe)** environment, actively participating in Sprint Planning, Daily Stand-ups, and Retrospectives to ensure high-quality, iterative delivery.
- **Proactively transitioned** to a different development team to **broaden technical expertise** across diverse engineering stacks and technologies.
- **Built and optimized** an internal testing tool using **React**, **JavaScript**, and **Sitecore**, significantly improving internal development and testing workflows.

Education

Bournemouth University
Bachelor's, Software Engineering

September 2021 - June 2027
GPA: 4.5

- Pursuing a BSc (Hons) in Software Engineering with **First Class Honours**, specializing in Systems Design, Full-Stack Development, Application Programming, and Machine Learning.
 - Elected as **Student Representative** for **100+** Software Engineering peers, acting as a bridge between students and faculty to translate feedback into actionable improvements.
-

Certifications

- **AWS Certified AI Practitioner** | AWS | Feb 2026
 - **React Basics** | Coursera (Meta) | Feb 2026
 - **FastAPI - The Complete Course** | Udemy | Jan 2026
 - **Graph Developer - Professional** | Apollo GraphQL | Oct 2023
 - **Mastering TypeScript** | Udemy | Oct 2023
 - **Graph Developer - Associate** | Apollo GraphQL | August 2023
 - **IBM MQ Developer Essentials** | IBM | Feb 2022
-

Projects & Outside Experience

EveryWatch | Android Application (Personal Project) **July 2022 - August 2022**
South Korea

- **Developed and deployed** a native Android stopwatch application named **EveryWatch** using **Kotlin**, successfully launching it on the **Google Play Store**.
- **Managed the entire product lifecycle**, from UI/UX design and wireframing to technical implementation and production release.

Computing In Business Week Team Project **May 2022 - May 2022**
Software Engineer *Bournemouth, England, United Kingdom*

- **Awarded 1st Place** in the JPMorgan Chase 'Computing In Business Week' competition, earning an invitation to an exclusive 2-day workshop at their Bournemouth office.
- Conducted **stakeholder requirement analysis**, successfully translating complex business needs into **actionable technical specifications**
- Developed a **full-stack solution** by engineering a robust backend with **Python** and **Flask** and designing a responsive, user-friendly frontend using **HTML**, **CSS**, and **JavaScript**.

HireReady AI | Web Application (Personal Project) **December 2025 - Present**
HireReady AI (Personal Project) *South Korea*

- **Developing** a high-performance **full-stack** platform using **React** and an asynchronous **FastAPI** backend, designed to maximize employability through real-time CV analysis and skill optimization.
 - **Integrating Large Language Models (LLMs)** to perform **deep semantic analysis**, identifying critical skill gaps and delivering **data-driven recommendations** to improve job application success rates.
